

Save Water Indoors

The average family uses 21.7% of their water washing clothes, 1.4% washing dishes, 15.7% using faucets, 16.8% showering, 26.7% flushing toilets, 13.7% on leaks, 1.7% taking baths, and 2.2% on other uses.

Here's How

Save Water in the Bathroom

Check all faucets, pipes, and toilets periodically for leaks

A faucet drip or invisible leak in the toilet will add up to 15 gallons of water a day, or 105 gallons a week, which adds up to 5,475 gallons of wasted water a year. Check your flapper periodically to make sure it's a tight fit.

Install water saving shower heads

Low-flow showerheads deliver 2.5 gallons of water per minute or less and are relatively inexpensive. Older showerheads use 5 to 7 gallons per minute.

Try a navy shower

Due to a lack of fresh water aboard ship, sailors were taught to get wet, turn off the water, soap and scrub, then briefly turn the water on to rinse -- a good routine for all of us.

Take shorter showers or take a bath

Simply taking shorter showers will save gallons of water. For long exposures to the water, a partially filled bath instead of a shower will use less water.

Install a 1.6 gallon low-flow toilet

Ultra-low flow toilets use only 1.6 gallons of water per flush. Using these could cut indoor water use by as much as 20%. Older toilets use 3.5 to 7 gallons per flush. For more information on the City's Operation Low Flow toilet rebate program call 768-3655.

Check for toilet leaks

Once a year, check for toilet leaks. Remove the toilet tank cover and drip 10 drops of food coloring into the tank. After 15 minutes, check for color in the toilet bowl. If you see any color, your toilet has a leak and should be repaired immediately. Again, remember to check your flapper periodically to make sure it's a tight fit.

Check for toilet leaks

Once a year, check for toilet leaks. Remove the toilet tank cover and drip 10 drops of food coloring into the tank. After 15 minutes, check for color in the toilet bowl. If you see any color, your toilet has a leak and should be repaired immediately. Again, remember to check your flapper periodically to make sure it's a tight fit.

Don't use the toilet as a wastebasket

Using a wastebasket instead of the toilet for tissues and other bits of trash will save gallons of water that are otherwise wasted.

Install high efficiency, low-flow faucet aerators

Older faucets use between 3 and 7 gallons per minute. Low-flow faucet aerators use no more than 1.5 gallons of water per minute. The aerators can be attached to most existing faucets.

Fix leaky faucets immediately

A leaky faucet may simply need a new washer. Small faucet leaks can waste 20 gallons of water a day. Large leaks can waste hundreds of gallons.

Turn off the water while shaving, brushing teeth, etc.

Don't let the water run when you brush your teeth, wash your face or hands, or shave. This can save 3 to 7 gallons per minute.

Save Water in the Kitchen and Laundry**Fill your dishwasher**

Your dishwasher uses the same amount of water whether it is full or just partially full of dishes, so be sure to fill it. Many dishwashers have a water saver cycle to save even more water.

Keep drinking water in your refrigerator

Don't let the faucet run until the water cools down. Instead, keep a container of drinking water in the refrigerator. Running faucets waste 3 to 7 gallons of water per minute. Before rinsing, put the sink stopper in place instead of running the water. If you need to use the garbage disposal, release the used sink water as the disposal is turned on.

Defrost food in the refrigerator

When defrosting food, plan ahead to thaw it in the refrigerator or microwave oven instead of under running water.

Select proper water level for laundry

Unlike your dishwasher, you can control the amount of water used by your clothes washers. Select the proper water level for each load of laundry. A front load washing machine uses 1/3 less water than a top loading machine.

Reuse fish tank water

Use fish tank water on your household plants. Besides saving water, it's a good fertilizer as well.
